SUMMARY

Enthusiastic and responsible developer pursuing Computer Science Engineering, worked in Java, Spring Boot, Flutter, React, and JavaScript. Demonstrated ability in backend, frontend, and Android development through projects and internship experience. Seeking a dynamic role to leverage skills and passion for technology in software development.

EXPERIENCE

Java Developer Intern <div align="right">Oct 2023 — Present</div>
NEC Corporation <div align="right">*Noida*</div>
- Working and Learning as a Backend/Frontend Developer
- **Skills:** Java, React, Springboot, Tailwind, MySQL, Docker

Flutter Developer Intern <div align="right">June 2023 — August 2023</div>
Wormos Private Limited <div align="right">*Remote*</div>
- Worked on Flutter Framework to replicate the Client's Figma Design to a Mobile App.
- Significantly cloned the Figma design by 90%, resulting in the desired screen by the client.
- **Skills:** Flutter, Dart, Figma and Firebase.

EDUCATION

Bachelor of Technology in Computer Science and Engineering <div align="right">Oct 2020 - Present</div>
Bennett University
- **CGPA** - 8.91

Class 12th <div align="right">2019</div>
Delhi Public School,Kanpur
- **Percentage** - 82%

Class 10th <div align="right">2017</div>
Delhi Public School,Kanpur
- **CGPA** - 9.2

PROJECTS

PICSA
- Contributed to the PICSA project, I spearheaded frontend enhancements leveraging React, while also taking charge of Excel reporting functionalities and refining the UI to elevate user experience.
- **Technical Skills:** Apache POI, Java, Springboot, Git, React

MMES
- As part of the MMES project, I contributed to the frontend development and implemented robust report visualization functionalities.
- **Technical Skills:** React, MySQL, JavaScript, Tailwind.

QR Code Generator
- Implemented the frontend functionality for the QR Code generator project, which allowed for easy PDF upload, quick preview generation, and user-friendly download options, all of which improved the user experience overall.
- **Technical Skills:** React, Tailwind, Typescript, Figma, Git

Inbound Scanning
- Developed the frontend as part of the "Inbound Scanning" project. I created and executed role based authentication where two unique user interfaces for varying access levels: an administrator-only interface that offers full functionality upon login, and an employee-only interface that offers a restricted set of options upon scanning a QR code.
- **Technical Skills:** React, Springboot, Typescript, Tailwind, Git

SKILLS

Languages	Java, Python, C++, Dart, JavaScript, HTML, CSS, Latex
Development Tools	Firebase, Figma, VS Code, Android Studio, Git, Github,Node.js, Docker
Frameworks	React ,Springboot, Tailwind, Bootstrap, Bulma, Flutter, Express, Tensorflow
Platforms	Windows, Linux, Web
Database	MongoDB, MySQL
Version Control	Git, Github, Gitea
Artificial Intelligence	ML, Deep Learning, NLP, Pandas, OpenCV, CNN
Communication	English, Hindi
Soft Skills	Collaborating, Investigating, Motivated, Organizational, Problem Solving, Proactive, Team Player
